About Us

Welcome to Infinity CLUB

The Rise of Infinite AI-Powered Wealth Systems

InfinityCLUB is an AI-automated financial singularity engineered to create never-ending compounding wealth cycles through adaptive staking mechanisms, liquidity intelligence, and dynamic growth incentives.

It's a self-regulating ecosystem powered by AI that governs token emission, market balance, and reward evolution — creating limitless financial acceleration under intelligent control.

Vision & Mission

INFINITY CLUB

Vision:

To build the world's first AI-governed wealth evolution protocol driven by infinite compounding, contribution, and intelligent expansion.

Mission:

To empower a global network of wealth creators through a system that:

- Rewards performance with exponential financial acceleration.
- Stabilizes its own economy using AI-backed market intelligence.
- Expands value continuously through cyclical compounding dynamics.
- Creates a new financial identity layer where commitment fuels ascension.

The Infinity Loop Economy

INFINITY CLUB

Philosophy of Limitless Growth

InfinityCLUB operates on a 6-Stage Loop:

Core Ecosystem Architecture

INFINITY CLUB

InfinityCLUB Ecosystem Structure

Powered by AI-regulated smart contract modules maintaining continuous balance, liquidity strength, compounding flow, and sustainability.

Core Modules :

- Quantum Emission Matrix (QEM).
- Flux Liquidity Shield (FLS).
- Velocity Recycle Core (VRC).
- HyperGuard Lock (HGL).
- Infinity Sustainability Protocol (ISP).

INFINITY CLUB

Quantum Engine Modules

1. **QEM – Quantum Emission Matrix**
   AI-driven emission controller that adapts supply to staking activity, preventing inflation.

2. **FLS – Flux Liquidity Shield**
   Stabilizes price by managing liquidity flow and activating defensive burn mechanisms.

3. **VRC – Velocity Recycle Core**
   Burns and redistributes value into the system, converting exits into ecosystem reinforcement.

4. **HGL – HyperGuard Lock**
   Ensures emission integrity and value backing through staking ratio enforcement.

5. **ISP – Infinity Sustainability Protocol**
   AI engine for long-term system health prediction and adjustment.

Infinity Staking Engines

INFINITY CLUB

InfinityCLUB introduces two powerful staking engines designed to provide flexibility, higher rewards, and efficient compounding through the AI-driven Infinity Loop system.

Velocity Staking

- Stake **UPID** tokens directly.
  UPID (Unicorn Polygon Infinity Dao)

Bonded Yield Staking

- Bonded Yield Staking uses USDT to add liquidity on UniSwap (50% **UPID** bought at live price + 50% USDT).
  UPID (Unicorn Polygon Infinity Dao)

INFINITY STAKING ENGINE

INFINITY CLUB

VELOCITY STAKING

Stake with **UPID.**

BOND STAKING

Stake with **USDT.**

DAILY YIELD

0.7% - 1.2% Daily*

Daily yield varies based on token price, ecosystem liquidity, and market conditions.

Types of Partner Benefits

1. **Referral Bonus**
   Earn rewards for referring new partners.

2. **Direct Accelerator Bonus**
   Fast-track rewards for your direct team growth.

3. **Ascension Tier Rewards**
   - Rank-Based Reward
   - Unlimited Level Reward
   - Differential Bonus Reward

4. **Club Bonus**
   Special pool rewards for overall club growth.

5. **Prosperity Rewards**
   Exclusive rewards for achieving special milestones and sustaining long-term engagement.

Eligibility:

Invite at least one valid participant

(staking ≥ $100 equivalent).

Of every invitee's staking Yield.

- If Alice invites 2 members, she earns 10% of each member's daily Yield.
- If Bob invites 8 members, he earns 10% of each member's Yield. Auto Credited every 24 hours.

CLUB BONUS

HIGHER COMMITMENT • HIGHER YIELD • BIGGER REWARDS

Qualify Club Bonus Under 30 Days

CLUB A

$ 5,000

Self Deposit

CTO TURNOVER

2 %

OF EVERY **24 HOURS** YIELD

CLUB B

$ 10,000

Self Deposit

CTO TURNOVER

3 %

OF EVERY **24 HOURS** YIELD

CLUB C

$ 15,000

Direct Business

CTO TURNOVER

3 %

OF EVERY **24 HOURS** YIELD

QUALIFICATION PERIOD

30 DAYS

KEY POINTS

- Qualify for Club Bonus within 30 days.
- CLUB A & B require Self Deposit.
- CLUB C requires Direct Business.
- CTO Turnover is calculated as a percentage of every 24 hours yield.
- Higher commitment leads to higher returns.

Rank Based Reward

When you achieve a rank, you become eligible for the Rank-Based Reward.

RANK ACHIEVER

Your TEAM NETWORK

5% TEAM YIELD REWARD

Infinity Loop System

- Rank achievers **Receive 5% of the total team yield** generated within their network.
- Rewards are distributed automatically **Every 24 Hours** through the Infinity Loop system.

Differential Rank Reward

When you achieve a rank, you earn the Profit Ration difference between your rank reward and your downline's rank reward.

- You earn only the difference in reward percentage from your downline.
- If your downline has the same rank as you, no differential reward is generated.

PROSPERITY REWARDS

ACHIEVE MORE • DRIVE BIGGER • LIVE PROSPEROUSLY

Qualify Rewards Under 90 Days

$ 30,000	$ 60,000	$ 1,00,000	$ 2,00,000	$ 3,00,000

REWARDS BUSINESS BASED NEXT TO NEXT

- Team business is counted from **3 legs** only.
- Rewards business is calculated **next to next** (downline level).
- Achieve the required qualified business within **90 days.**
- Get your dream car **full paid** as **Prosperity Reward.**

Turbo Swap Unlock System (High-Speed Liquidity Booster)

Turbo Swap generates buy pressure on unlocks.

How it works :

On unlock, purchase proportional **UPID** via Turbo Swap.
Purchase confirms and activates schedule.
Cooldown per action for fairness.
5% sell fee routed to VRC for buybacks.

Benefit	Impact
Constant buy pressure	Supports price floor
Organic liquidity expansion	Increases LP depth
Encourages reinvestment	Drives Infinity Loop progression
Reinforces treasury	Maintains sustainability metrics

Transforms unlocks into positive events.

Turbo Withdrawal & Release Protocol

DECENTRALIZED
SECURE
TRANSPARENT
GLOBAL REWARDS

Web3 | 60/40 Withdrawal Distribution Mechanism

The Turbo Withdrawal Protocol is designed to provide a structured withdrawal mechanism, combining instant wallet transfers with a progressive daily release system.

1 Withdrawal Allocation 60/40 Model

When you initiate an eligible withdrawal, the requested amount is allocated according to the following distribution model:

40% Direct Wallet Transfer

- 40% of the requested withdrawal amount is transferred directly to your registered wallet address.
- 0% deduction charges apply to this portion.

60% Turbo Wallet Allocation

- The remaining 60% is allocated to your Turbo Wallet.
- A 20% deduction charge applies to the Turbo Wallet allocation.
- The net amount is then made available for structured daily releases.

2 Turbo Wallet Daily Release Mechanism

The net balance credited to your Turbo Wallet is released progressively over a period of 50 days.

- Daily Release Rate: **2% per day**
- Release Duration: **Up to 50 days**
- Release Method: Progressive daily balance release
- Access: Released amounts become available according to the applicable protocol rules.

3 Turbo Wallet Re-Staking

The Turbo Wallet also supports re-staking functionality, allowing users to participate again using eligible Turbo Wallet funds.

- Re-Staking Deduction: **0%**
- Seamless Participation: Re-stake eligible funds directly through the platform.
- On-Chain Interaction: Transactions are subject to the applicable smart contract rules and network requirements.

4 Protocol Summary

Feature	Protocol Rule
Withdrawal Distribution	60% Turbo Wallet / 40% Direct Wallet
Direct Wallet Deduction	0%
Turbo Wallet Deduction	20% of the 60% allocation
Daily Release Rate	2% per day
Release Period	Up to 50 days
Turbo Wallet Re-Staking	0% deduction

Protocol Flow

1. Withdrawal Initiated
2. 60/40 Allocation
   - 40% Direct Wallet (0% Deduction)
   - 60% Turbo Wallet (20% Deduction)
3. Daily Release at 2% for up to 50 Days
4. Re-Staking (0% Deduction)

OR

Turbo Withdrawal (As Released) **10% Deduction**

Important Notice: All withdrawals, deductions, daily releases, and re-staking operations are subject to the platform's applicable terms, smart contract logic, and transaction conditions. Applicable network gas fees may be charged separately. Users should review the complete withdrawal rules before initiating a transaction.

Tokenomics :
Infinity Token (UPID)

Parameter	Details
Token Name	Infinity Token
Symbol	UPID
Type	Governance & Utility
Network	Polygon
Total Supply	Dynamic (AI-regulated under QEM with HGL safeguards)
Emission Cycle	Every 24 hours (rebase-based reward epoch)

Supported Wallets

TRUST · TP · WEB3 Wallet

Emission regulated by QEM & HGL to match staking demand; burns via VRC on unlocks/buybacks; Momentum Pool from daily emission. Structured for active rewards and anti-inflation.

Reward Logic

- **Triple-Line Bonus:** Two direct leaders in the same branch each receive 5% on ROI flow within their lineage.
- **Skip-Level Bonus:** When a rank gap occurs, uplines receive 5% compensation for skipped levels.
- **24 Hour AI Epoch Validation:** Every 24 hours, AI verifies holdings, contribution, and referrals — upgrading ranks and distributing rewards instantly.
- **Governed by Infinity Council:** All bonuses and logic executed automatically on-chain.
- **Each rank unlocks higher multipliers on team rewards;** income passive if network performs. Singularity is the pinnacle of dominance.
- **Maximum Yield :** 3 X of Investment.

Release and Turbo Swap Functions

The Release function (Linear Unlock & Burn Model) allows users to claim staked rewards or unstake positions over selected durations, with base burn fees applied to discourage rapid exits and promote ecosystem stability. Burns reduce circulating supply, routing a portion to VRC for buybacks and reinforcement. Ascension Tier ranks provide the Infinity Ascension Perk, reducing these burn fees by 1% per rank level (e.g. 1% reduction for Spark, up to 15% for Singularity), applied to unstaking and claiming stable/dynamic rewards. This incentivizes long-term commitment and network growth.

The Turbo Swap function enhances liquidity during unlocks by requiring a proportional **UPID** purchase, confirming the request and activating the release schedule. It enforces a cooldown for pacing and applies a 5% sell fee (routed to VRC), creating constant buy pressure, expanding LP depth, encouraging reinvestment, and reinforcing treasury turning potential drains into positive ecosystem events.
